THE WORLD OVER

PRICE CUTTERS AND BONUS CHEQUES

There may be many reasons for the continuation of this business depression, but not the least of them is the continual price cutter in every business whether large or small. Many claim that it is the smaller businesses that are the worst offenders and it is probably true, for they can afford to do so more readily than the large concern, which has to make both ends meet and pay out full salaries each month in order to keep going. Much of the cause of this business depression falls on the shoulders of these price cutters. When business is slow they cut the price in order to boost sales. They do not, however, boost sales. It just takes a job out of one man's hand and puts it in another. In time the customer demands a cheaper job and he gets it. Finally this price cutter is forced out of business, for his equipment wears out and he cannot produce the very best in his trade. He has not put away a penny for de-reclation and therefore cannot purchase new equipment. Then the trouble begins anew and another cut rate man crops up. None of them last more than a few years and by keeping down the commodity prices they hinder the advancement of the world trade. We can not expect to get back to normal times until prices start on the incline and then everything will go with it.

This again, cannot happen till the farmers of the west have the money to keep the Canadian manufacturers busy and pay the increased wages and the farmer will not have the money till he gets a fair return for his crops. The root of all this trouble lies in the poor underpaid farmer. This is where the governments want to concentrate their efforts. Relief road work and other undertakings will not help. Commodity prices must be raised and this can be done by the government bonus at the present time and as far as we can see, increased taxation to pay the bonus. If the nation can stand the tax pressure for a few years the depression may automatically right itself.

All of which is in favor of a government bonus on crops, etc., said bonus to be of a general benefit to all, whether they are fortunate in raising a crop or not. In the case of the grain farmer the acreage bonus is in our opinion, the only logical one. Then there should be a bonus on all cattle raised in the Dominion, to encourage more mixed farming. These bonuses will keep the farmers' table well supplied, and when the farmer in the West has money, times are good.

In other words it is not the high cost of living, but the low cost of living that is keeping the world back.

Responsible farmers throughout the three prairie provinces are now being supplied with foundation stock, cattle and sheep, by the Dominion Agricultural Credit Company Limited with payments deferred over three years. The organization is recommending the acquisition of dairy cattle wherever possible as a means of obtaining a revenue irrespective of cash crops.

SETTLEMENT AT NEW MINE BUILDING UP

The past couple of weeks has seen quite a change at the new mine site of the Peerless Carbon Collieries, that is about a mile from town, just across the creek from the Oliphant mine, on the north side of the track. A number of buildings are being moved daily from the old site and these buildings are being placed in rows, or streets, a certain amount of ground being allowed for each dwelling.

The work on the new mine itself has been started, a crew of men now being at work on the air shaft on the south side of the C.P.R. track. The new tipple will be located on the north side of the track.

Black Diamond Working

While construction work has been going on at the new mine site, the Black Diamond mine is active supplying the town's coal orders and fairly steady employment is being provided the workers. In spite of warmer weather, the coal orders continue to come in.

The Balogh Coal Company is also reported to be active at this time of the year.

OUR SOUTHERN NEWS ITEMS

Mr. J.J. Bertsch and his son Otto, and daughter, Hilda, made the trip to Hanna on Thursday of last week where they were visiting with Mr. and Mrs. R. Neubauer.

Mr. and Mrs. C.C. Permann went into Calgary on Friday of last week and returned the same day.

Mr. and Mrs. Fred Gittel and their daughter Katie, and son Sam, and Mr. and Mrs. Bill Odd of Crossfield, were visiting with Mr. and Mrs. Otto Gittel over the week end.

Mr. Ed. Sche'l made a trip to Turner Valley to get a load of gas.

RUSSIA BUYS WHEAT FOR SOVIET TROOPS NEAR MANCHURIA

The Russian Government, which last year brought down world wheat prices by exporting, has now turned buyer, owing, it is understood, to the poorness of the home harvest.

Through the Russian grain trade organization in London, last Wednesday, between 35,000 and 40,000 tons of Canadian wheat were purchased for immediate shipment from Vancouver to Vladivostok. Inquiries have also been made for similar shipments upon a smaller scale from the United States and Australia.

These consignments are wanted, it is understood, for the Russian army on Manchurian frontiers, thus leaving the question of the Black Sea supply unanswered, since it may be cheaper

WHEAT BONUS ENDS JUNE 15

Farmers who have 1931 grain which they wish to sell this summer are reminded that the five-cent bonus agreement expires on June 15th. Take advantage of this extra five cents by selling your surplus grain before that date.

AAAAAAAAAAAAAAAAAAAAAAAAAAAA

ALBERTA NEWS

Cheques up to the value of \$5 do not require any stamp, however, all cheques (under the new act) over \$5 and up to \$100 are taxed three cents, and above the latter amount six cents in stamps must be added. This new tax came into effect on May 1st.

The Imperial Bank at Trochu closed down last week.

At the West Canadian Collieries mine at Blairmore, one man was arrested when a crowd of 400 endeavored to stop about 60 who desired to work at the mine, when the Company announced that it was opening on an open-shop basis.

Lester E. Holman, a farmer of the Taber district died last Wednesday as a result of injuries received Tuesday on his farm, when he was attacked by an angry bull.

Between \$200,000 and \$250,000 will be required to repair damage to the Alberta Government Telephones done during the recent blizzard that swept the southern part of the province recently.

Sentences totalling 354 years, in 3-year terms, were handed out at Nelson B.C. recently when 118 Doukhobors were sentenced to the penitentiary for participating in the nude parade. Over 200 more were arrested recently on the same charge and have been committed for trial.

The U.G.G. elevator at Gleichen was broken into last week and the principle item taken was a big bass horn.

Excessive size may save May Keeling, 600 pound Alabama neccess, from a jail sentence. Officers charge her with selling whisky, but she can't be gotten out of the house without cutting away part of the wall, besides she could not be gotten into the jail if convicted.

TWO BUSINESS PLACES SOLD

This week has seen two changes in the management of local business concerns, Paul Stefan having taken over the bakery business from R. C. Barr, and Mr. and Mrs. Jensen having purchased the grocery from Kathleen Nash.

In both cases the new operators took possession the first of this week.

An announcement appears in this issue regarding the change made in the management of the Carbon Bakery. Paul Stefan, the new owner, is having the building remodelled and intends to operate a high class bakery. He has considerable experience with the National Bakery at Drumheller and will put out a loaf equal to the product of that firm. Bread will sell at four loaves for 25c and Mr. Stefan is making an appeal to all local citizens and business houses to buy Carbon-Made bread. It will only be with the entire support of the townspeople that will enable the new proprietor to put out quality bread at the low price mentioned.

to ship wheat to Siberia from America and Australia than from European Russia.

Between 5,000,000 to 10,000,000 bushels are estimated as likely to be needed in Russia before the new wheat crop there is harvested.

RED BUS LINE COMMENCES DOUBLE RUN

Commencing on Tuesday of this week the Red Bus Lines will operate twice daily service between Drumheller, Carbon, Beiseker, Irricana and Calgary, and with this new service they will make morning delivery of the Calgary Albertans to these points. The bus will leave all points at 8 o'clock every morning and 5 o'clock each evening for the round trips. A new schedule will be issued shortly regarding time, etc. of the bus travels.

The Red Bus Lines added a Studebaker 7-passenger sedan to their run last week, to cope with increased business and we understand that the operators are contemplating a run right through to Wayne.

The Red Bus Lines now operate daily from Calgary to Acme, Swallow, Three Hills and Trochu, and return. Twice daily service is provided to Irricana, Beiseker, Carbon and Drumheller and intermediate points.

FIRST BANK OF MONTREAL CROP REPORT

General—Agricultural operations in every Province of the Dominion have been delayed by a cold, wet spring and in consequence the planting and seeding of the principal crops will probably not be completed until from ten days to three weeks later than was the case last year, when field work was ahead of the average. In the three Prairie Provinces the land prepared for seeding at the opening of the season is estimated at 20,500,000 acres, which compares with 19,000,000 acres last year. Moisture conditions are better than for the past three years, and the seed bed is in good condition for germination in all areas. Rain and snow, which delayed field work for about ten days, has made seeding somewhat later than usual, but wheat seeding is now general, being about 30 per cent completed in Alberta, 35 per cent in Saskatchewan and 75 per cent in Manitoba. Indications point to a decrease wheat acreage and an increase in the acreage of coarse grains seeding of which has hardly commenced.

Prairie Provinces—Alberta—Wheat seeding in the Northeastern area is about 15 per cent completed. The seed bed is in excellent condition, with ample moisture.

Southeastern Area—Soil conditions for seeding are more satisfactory than for some years. About 40 per cent of the wheat seeding is completed.

Western Alberta—Wheat seeding is now being resumed and 25 per cent is estimated to have been completed. Sugar beet seeding is about ten per cent completed.

Saskatchewan—Northern Area—The seeding of wheat, which commenced

LETTERS TO THE EDITOR

Sometime ago you asked me why Carbon could not have a creamery.

As you no doubt know the Alberta Dairy Pool when it was formed, decided that large centralizers were to be preferred to small local plants, and past years have proved this idea correct.

The Observer in the Calgary Weekly Herald of May 5th has this to say: "Investigations conducted show that the cost of manufacturing butter and cheese can be reduced several cents per pound by increasing the average out-put per dairy plant. Here are some illuminating comparisons:

Butter manufactured in 1930		
Country	No. of plants	Av. per plt.
Canada	1029	142,569 lbs.
Denmark	1655	349,000 lbs.
New Zealand	135	1090,600 lbs.
Queensland	51	1454,000 lbs.

Over half the creameries in Canada produced less than 80,000 pounds in a year. By eliminating the small plant and centralizing on plants, making a million pounds of butter or over in a year, a saving of about 3 cents per pound could be effected. This would have the effect of saving in manufacturing alone of about \$5,000,000 a year or over \$30,000 per year per plant.

Alberta produces 17,000,000 pounds of butter in 100 plants and we know that two pool creameries produced over one million pounds each in 1930 and 1931. These two produced over three million pounds and another well over one-half million pounds.

The pool creamery that has been operating the largest (the one at Albx) claims they have benefited their members to the extent of 3½ cents per lb. for the past seven years.

There are other savings to be made in larger plants, such as buying in large quantities; a large uniform churning, making a more uniform grade of butter.

We have figures worked out from the Trade and Commerce reports that show that in the 15 creameries in the Red Deer district, with one centralizer, there is a saving of two cents per lb. in salaries alone.

There is only one advantage the local creamery has and that is in the express costs. On the average it costs one cent per pound more for the big plant as so much cream is delivered locally, but this would not apply to Carbon as it does not produce enough locally.

We would all like to see manufacturing plants started in Carbon, but facts are against a creamery and we know it would be doomed to failure.

Respectfully,

L. B. HART

about April 18th, was delayed by wet weather and is now about 25 per cent completed. No coarse grains have been sown. Moisture is ample and the acreage of all crops is estimated at about the same as in 1931.

Southern Saskatchewan—The wheat seeding commenced on April 15th, but was delayed ten days by wet weather although operations are now general. Of the wheat crop 40 per cent is seeded with sufficient moisture to ensure germination and check soil drifting.

In Manitoba wheat seeding is now reported to be practically completed. Moisture conditions are reported to be good. There will be an increase in the acreage of both wheat and coarse grain

Teamwork

The one word or term embodying this thing most needed now and most likely to be needed in an increasing way for the long pull back to more satisfactory economic and business conditions is, in our opinion, "Teamwork." If there ever was a time which called for "the long pull and the strong pull altogether," that time is now.

A farmer following his horses as he guides a plough along the furrows knows what teamwork on the part of the horses means; also teamwork between the horses and the ploughman. Possibly he realizes the full value and necessity of such teamwork in an even more striking manner when it is lacking, and, as the outcome, proper results are not being achieved.

Men participating in the many fields of sport have a full appreciation of the value of teamwork. Every successful captain of a team drills it into his men. But how frequently one reads that such-and-such a team, while composed of brilliant and superior individual players, lost out to an individually inferior team because of a lack of co-ordinated effort.—In a word, teamwork. And this lack of teamwork all too frequently results because one or more of these individually brilliant players desire to keep themselves in the "spotlight," play to the gallery, and win plaudits for themselves rather than for the team as a whole.

Success in military exploits depends to a very large extent upon teamwork, the co-ordination of every arm of the service to the achievement of one common object, the co-operation of each unit with every other unit, both in preparation and final action, to the end that victory be won. Without this "union in service" the bravest men in the world are likely to suffer defeat at the hands of an inferior but more unified force. Victory does not always rest with the big battalions, but with the compact body which moves and acts with precision as one man.

The same principle applies with equal truth and power in the realm of national, political, and community life. If in an army the artillery considered that it, and it alone, was the effective instrument in winning battles, and, instead of co-operating with the infantry, tanks, machine-gunners and aircraft, actually ignored and even strove against them, the enemy would win. Yet, how often groups of people having a common object in community effort or in the political arena instead of working together to achieve that object, actually oppose each other solely because they do not agree upon every detail of their programme, nor see eye to eye as to the methods by and through which the reforms desired by all are to be brought about. And the result, of course, is victory for the other group or policy to which they are all opposed.

There are many time-honored maxims which point the truth that teamwork is essential to success. "In union there is strength," "United we stand, divided we fall"; while for the enemy forces there is always the further maxim: "Divide and rule."

Teamwork can only be brought about by a willingness to compromise. Some good people regard the word "compromise" as something essentially wrong, as a great evil. True, right cannot compromise with wrong, nor honesty with dishonesty, but where two are striving for what both believe to be right, and in opposition to what they are agreed is unwise or wrong, it is the height of folly to divide into separate and opposing camps, weakening each other and the cause they both desire to advance, simply because of minor differences of opinion as to exact objective to be achieved or the methods by which it shall be achieved. Unless there is compromise, rather than each one insisting upon acceptance of their views to the exclusion of others, failure for both must inevitably follow and victory be recorded for the common enemy.

The experiences through which the world is passing have impressed a majority of people with the need for more or less radical changes in our economic and social structure. That change is necessary is fairly well recognized, but some desire to move much more rapidly and drastically than others; some believe the remedy for our ills is to be found in another policy; others, again, advocate something else. All want improvement, reform. But through divided councils, lack of co-operation, in a word, an absence of teamwork, nothing but confusion has thus far resulted, while those minorities who are more or less satisfied with things as they are, by working together, are enabled to dominate.

This condition prevails in society, business, community effort, in municipal, provincial, and international politics. It is even found in family life. It is fatal to progress, a continually delaying factor in the onward march of reform.

What the world needs today is not antagonism, but mutual sympathy; not competition, but co-operation; not isolated effort, but co-ordination of effort; not single-handed play, but teamwork. And these things can only be brought about by compromise. So, let's compromise and develop mutual strength through teamwork. The world will then begin to get somewhere, and out of the slough of depression in which it continues to founder.

Too Bad For the Wife

A farmer appeared the other day at a theatre that is accepting two dozen eggs as the price of admission. He handed a paper sack to the ticket-taker.

"There's a couple of dozen eggs, mister," he said. "I want to see your show. I'd have brought the missus with me if the hens had shelled out a little better."

Worms are encouraged by morbid condition of the stomach and bowels, and so subvert. Miller's Worm Powders will alter these conditions almost immediately and will sweep the worms away. No destructive parasite can live in contact with this medicine, which is not only a worm destroyer, but a health-giving medicine most beneficial to the young constitution.

The 45,000,000th vehicle to pass through the Holland Tunnel of New York was recently counted.

Poison ivy is most virulent at the flowering season.

Called His Bluff

The time had come to dish up the rations, and in an Irish regiment the quartermaster and his assistant had been portioning them out in preparation for distribution.

The assistant turned to the quartermaster and, with a twinkle in his eye, said: "Av ye plaze, sorr, there's a loaf short. Who'll I give it to?"

"Keep it yourself," Mike replied the quartermaster.

China Leading Customer

China is the leading customer for complete aircraft made in the United States. In both 1930 and 1931 China held the lead over all other countries. The Chinese like American machines because their territory bears a remarkable similarity in flying conditions to those in the United States.

Suffering in silence is more fun if you explain what you're doing so nobody will miss it.

Palpitation of the Heart Could Hardly Get Around

Mrs. Charles Storms, R.R. 5, Meton, Ont., writes:—"I was troubled with palpitation of the heart; couldn't sleep, day or night, and was so weak I could hardly get around."

After taking Milburn's Heart and Nerve Pills I was greatly relieved of these attacks.

My mother also has great faith in them and finds no other medicine can help her so much for heart trouble.

I can assure you that Milburn's Heart and Nerve Pills are a wonderful builder."

Keep On Working

Despite Disarmament Talk New War Weapons Being Invented

Just as a fillip to the disarmament discussions, we suppose you noticed that Hadfields, Limited, munition manufacturers of St. Field, England, have developed a high explosive shell that will pierce the best quality of armor plate one foot thick, from a distance of ten miles.

While the world talks much of disarming, the men who sit back and invent new schemes for killing millions keep right on working—and producing results.

Down in Weight and Very Pale

Mrs. Beare Thankful For Way in Which Dr. Williams' Pink Pills Helped Her Back To Health

Gained Weight and Color

"I can truly recommend Dr. Williams' Pink Pills, for they did wonders for me," writes Mrs. Mable R. Beare, New Westminster, B.C. "After a long and very trying illness, I was down to 90 lbs. in weight. I could not eat a hearty meal. In fact, I have had to go away from the table hungry, from a dinner I dared not touch. I was also very pale. I had often read about Dr. Williams' Pink Pills, so thought I would give them a trial. I soon found I was able to eat with any one, and life began to look brighter. My weight came up to 118 lbs. and my lips and cheeks had lots of color. I am more than thankful I ever took Dr. Williams' Pink Pills, and I only hope others will try them."

Dr. Williams' Pink Pills actually create an abundance of new red blood, which is the reason they have given new vitality and strength to thousands of such nervously exhausted women. Equally helpful for growing girls. Try them. At your druggist's in the new glass container. 50c.

The First Bicycle

A Frenchman, M. de Sivrac, is said to have originated the idea for a bicycle. His first machine appeared in Paris during 1690. It consisted of a wooden frame and two wheels. Locomotion was achieved by pushing on the ground with the feet.

Worms feed upon the vitality of children and endanger their lives. A simple and effective remedy is Mother Graves' Worm Exterminator.

Low Ocean Fares

Britain Preparing For Greater Invasion Of Tourists From Canada Than Ever Before

Britain is preparing for a greater invasion of tourists from Canada and the United States than ever before, this season. This is due to more determined efforts on the part of the Travel Association of Great Britain and Ireland, who have highly organized their resources for welcoming visitors to the Old Land.

Recent ocean rate reductions to the extent of 20 per cent. have now made it possible to spend a summer holiday by going to Europe, doing whatever sight-seeing one's time permits, and returning to this country for an all-inclusive charge of less than seven dollars a day, according to the Cunard and Anchor-Donaldson lines. These tours in Europe include the best sight-seeing in the time available, chiefly by motor coach, as well as by rail and steamer. These tours also include visits to the Continent, in France and Belgium especially.

"Modern Third Class" is used for the ocean crossing and to many people whose memories of Third Class date back to many years ago when they first came to Canada, this class offers surprising comfort. Nowadays, in fact, third class is more comfortable than first class was thirty or forty years ago.

Ontario and Quebec provinces expect to reap some benefit from the mass of tourists who pass through Montreal on their way to Europe, as many western Canada and United States visitors spend some time seeing Ottawa, Toronto and Montreal, en route.

Like a Grip At the Throat. For a disease that is not classed as fatal there is probably none which causes more terrible suffering than asthma. Sleep is impossible, the sufferer becomes exhausted and finally, though the attack passes, is left in unceasing dread of its return. Dr. J. D. Kellogg's Asthma Remedy is a wonderful remedial agent. It immediately relieves the restricted air passage as thousands can testify. It is sold by dealers everywhere.

Some Of The Advantages As Well As Disadvantages In Growing Of Reward Wheat

(By H. G. L. Strange)

As the wheat fields in Western Canada began to extend northward the need was felt for a wheat variety that would mature earlier than Marquis, so as to avoid damage from early fall frosts. Several new varieties had been produced by plant breeders to fill this purpose, notably the Red Bobs selections, originated by Dr. Seager Wheeler, Supreme, Early Triumph and Red Bobs 222, the latter having been re-selected by the University of Alberta, also the varieties Garnet and Reward produced by the Dominion Experimental Farms, Ottawa.

Because of its high yield Garnet wheat quickly became popular and in the last few years has increased by leaps and bounds in Northern Alberta and Northern Saskatchewan. Some concern, however, has been felt that because the milling qualities of Garnet are somewhat different to those of Marquis, and because Garnet flour has a slightly yellowish tinge, that the quality and reputation of Canadian wheat on the world's markets might be harmed if too large an amount of Garnet should be grown.

Because of this concern some have recommended that some of the other earlier varieties might be better. Reward wheat is one that is widely recommended.

Reward was originated at the Dominion Experimental Farm, Ottawa, and is the result of a cross between Marquis and Prelude made by Dr. Charles Saunders in 1912. Under the direction of Mr. L. H. Newman, the present Dominion Cerealist, the variety was tested for several years by several hundred co-operators in different parts of the west. Finally the variety was released by the Minister of Agriculture for further trials by farmers in 1923.

Reward wheat has this year been accepted for registration by the Canadian Seed Growers' Association, which means that the scientific plant breeders of Canadian Institutions consider that the variety is of good economic value and is well-suited for use in Western Canada. There can, therefore, be no need for hesitation in the use of this variety by any farmers who find that their districts and farms are suited to Reward wheat. The Dominion Cerealist has now standardized the variety and Registered Seed of Reward, true to variety and sealed in the sack, will undoubtedly be available to farmers in the near future.

The official description of Reward wheat is as follows: Time of maturity 5 to 8 days earlier than Marquis—height of plant 3 to 4 inches shorter than Marquis on the average—strength of stem a little stronger than Marquis—awns absent except for a few short apical awns, usually irregular in length, glume covering, slightly to heavily pubescent (or hairy), depending on season and locality, grain color red, usually darker than Marquis, grain texture hard, rarely plebeian or starchy.

The head of Reward is generally shorter and more lax than Marquis, while the spikelets are usually more or less irregularly arranged, giving the head a characteristic ragged or spiral appearance. As previously stated the glumes are pubescent or covered with short hairs which can usually easily be seen with the naked eye, magnifying glass. This is one of the always with a magnifying glass. This

"But the boat sails on the 13th of the month. Aren't you superstitious?"

"A little, but it's my wife who's sailing."—Buen Humor, Madrid.

W. N. U. 1941

is one of the characters that help in identifying the variety.

The milling and baking values of Reward wheat are excellent. It gives a high yield of flour. It bakes into bread, giving a large well piled loaf of excellent color and texture. The berry is uniformly plump, of a clear red color, seldom being plebeian or starchy. This is the reason this variety will often bring No. 1 Hard and No. 1 Northern in the Northern districts where Marquis and some other sorts seldom obtain better than a No. 3 grade.

The straw is shorter and stiffer than in either Marquis or Garnet, and in wet years Reward will often stand up when some other varieties, particularly Garnet, go down. The chaff is tight on the kernel, which enables it to stand a considerable amount of moisture in the fall without sprouting in the stock, such as often happens with other sorts, particularly with Garnet.

It is from 5 to 8 days earlier than Marquis, or about as early as Garnet wheat in most places, although in other places it is 2 or 3 days later than Garnet, but it is always earlier than Marquis.

Weights very high to the bushel. Usually two or three pounds more than Marquis, Garnet or other sorts. Weights of 65 and 66 pounds to the bushel are quite common with Reward wheat. Reward is probably the best of all varieties of Hard Red Spring Wheat for Exhibition purposes. Its high weight per bushel, bright, plump and pleasing berry of good lustre usually win it a high place in competition with other varieties.

Reward wheat is not a rust resistant wheat, but because of its earliness in rust years often suffers less damage from rust than many of the other varieties. Investigations show that Reward wheat does not shatter as much as some of the other varieties, particularly Garnet.

On rolling land wheat on the high ridges usually ripens before that in the low spots. Reward will stand on these high places uncut after ripening for a considerable time without the berry shrinking or discoloring, thus the whole field can be allowed to ripen thoroughly before cutting; therefore the sample should be of an even color and plumpness even from such rolling land. Its stiff short straw, early maturity, non-shattering head and ability to stand after ripening without much loss of plumpness, weight or color, makes Reward wheat an excellent variety to use for Combine Harvesting.

The most defect of Reward wheat at the present moment seems to be that on the whole the yield is lower than either Marquis or Garnet, but in some districts farmers state the yield of Reward is higher than Marquis or Garnet, and in many districts where most farmers report lower yields of Reward there are often one or two farmers who report higher yields. In most cases those who report high yields of Reward have seeded from a peck to half a bushel more than is usual with Marquis or Garnet. Every case investigated where the farmer seeded two bushels of Reward to the acre reported as giving a satisfactory yield.

Empire Reforestation

B. C. Douglas Fir Now Grown Extensively In England

During the eleven years ending in September, 1930, the Forestry Commissioners of Great Britain planted a total of 32,330,000 Douglas fir trees on various sites in England, Wales and Scotland. All these trees were raised from seed furnished by the Forest Service, Department of the Interior, through their seed-extraction plant at New Westminster, British Columbia. A considerable quantity of seed of other western species was furnished to the Commissioners from the same source. The New Zealand Government also took a large quantity of tree seed.

Economic improvement in French Indo-China shows increasing momentum.

Recent Discovery Interests Astronomers

May Be Asteroid Nearer To Earth Than Any Yet Found

Astronomers at Mount Wilson Observatory and others in this country and Europe are keeping a close watch on Delporte's "object," an asteroid or comet discovered recently by an astronomer at the University of Brussels.

"Our observations of it have disclosed no tail and seemingly only reflected light," said Dr. Frederick H. Sears, indicating that it is an asteroid and one much closer to the earth than any yet found.

He is assistant director of the local observatory, a branch of the Carnegie Institution of Washington.

"Discovery of an asteroid nearer the earth," Dr. Sears said, "would enable us to obtain a more accurate value of the distance from the earth to the sun, upon which the measurement of distances to all heavenly bodies is based."

"We are much in the position of a surveyor computing the width of a river by 'shooting' at a given point across the stream from two different points on his side of it, and determining the angles of the imaginary triangle. The narrower the stream the more accurate his measurement will be."

"Our computation of 93,000,000 miles as the distance of the sun from the earth is based on the estimate of 13,000,000 miles as the distance from the earth to Eros, the nearest asteroid yet found."

Prices May Be Better

Possibility Of Advance In Wheat Predicted By U.S. Official

A "strong possibility" of better wheat prices are seen by George S. Milnor, president and general manager of the Grain Stabilization Corporation. In a statement Milnor said:

"While in Europe I visited France, Italy, Germany, Belgium and England, and also met our foreign representatives from other countries. Europe will receive rather heavy imports of wheat between now and the harvesting of their new crop. Russia has practically completed the shipment of her wheat surplus from the last crop and the supplies from that source will be negligible until after harvest; therefore, Europe must look principally to Canada, the United States and Argentina for their supplies."

Russia announces the successful production of rubber from a plant named "towsagis."

Electrically heated uniforms and shoes for traffic policemen have been demonstrated.

A new process makes the basic color of Portland cement tan instead of gray.

Great Britain And United States Unite In Opposing Abolition Of The Larger Naval Vessels

Rainy Lake Map Sheet

Lake Country East Of Winnipeg Is A Paradise For Canoeists

Very informative and interesting is the Rainy Lake Map Sheet of the National Topographic series, recently published by the Topographical Survey, Department of the Interior, Ottawa.

The map covers the country along the international boundary from Quebec, Ontario Provincial Park on the east to within thirty-three miles of the town of Rainy River on the west. In addition to agricultural, mineral, forest and water power resources embraced in the area, it is known as a great hunting and fishing region. The Port Arthur, Rainy River and Winnipeg line of the Canadian National Railways runs through the district from east to west, picking its way through the maze of lakes and rivers, which were the means of transportation from the time of the opening up of Western Canada until the railway came, about the beginning of the present century. The lakes and broken country are a paradise for the canoeist, the fisherman, and the hunter, and the waterways are so intricate that the voyageurs and trappers of the fur companies from the time of La Verendrye onward were always searching for shorter routes for the carriage of their furs and trade goods.

The chief centre of population is Fort Frances, named after Lady Simpson, the wife of Sir George Simpson, one of the famous governors of the Hudson's Bay Company. Fort Frances is situated on Rainy River a few miles below the point where it emerges from Rainy Lake. Near it are shown the water powers with which its name is associated. On the south side of the river in United States is the town of International Falls. The agricultural areas are chiefly in the western portion, extending from Fort Frances to the townships indicated on the extreme western edge of the map.

The railways and highways in United States which bring travellers and tourists into this part of Canada are also shown. The map which is more complete in all topographic detail of this district than any previously issued, may be had at a nominal price upon application to the Director of the Topographical Survey, Department of the Interior, Ottawa.

"I met your husband yesterday, but he didn't see me."

"I know. He told me."

Another thing that doesn't turn out as you wish is the auto ahead of you.

Great Britain and the United States fought for their battleships at the Arms Conference at Geneva, forming a defensive alliance against an organized offensive of the small powers who wish to classify all ships over 10,000 tons as aggressive.

The small powers would abolish battleships or internationalize them within the League.

The United States and Britain received moderate support from Japan and lukewarm encouragement from France.

Senator Claude A. Swanson, of Virginia, announced at the meeting of the naval commission that the United States unequivocally opposed classifying battleships as offensive weapons. They are the backbone of the United States defense system, he said, and "a threat to no nation," since we covet no one's territory. He stressed the United States obligation to keep the Panama Canal open in peace and war and to defend its Far Eastern possessions.

Speaking and gesturing in a senatorial manner, he continued:

"If we had completed our naval programme after the war, it is conceded we would have been supreme on the seas, but we agreed to be a threat to no nation... the battleship is cheaper and more effective for defensive purposes than to build fortifications along our coastlines. Battleships have saved us a great and expensive army for defense purposes."

"We realize that naval power plus military power would menace every nation. We only wish the people who have armies had gone as far as the naval people in reducing and limiting."

He declared cruisers to be of greater offensive use than battleships, particularly in preying on commerce and blockading.

Vice-Admiral A. D. P. R. Pound, of Great Britain, supported Swanson, declaring that general naval superiority, not capital ships, enables attacks on trade. Similarly, he continued, it is not fair to claim that battleships are destined for carrying out invasions.

"The capital ships of the world can now almost be numbered on the fingers of the two hands," he said. "They are more precious than rubies to the countries possessing them. No nation is going to risk them by pitting them against coastal fortifications."

Baron Von Rheinbaken, of Germany, announced that Germany is willing to sacrifice her powerful and efficient "pocket" battleships on the altar of disarmament if others scrap battleships over 10,000 tons. Defending the "pocket" ships as defensive rather than offensive, he said:

"Germany's 10,000-ton battleship costs one-half as much as your battleships. You would be saving money if you adopted Germany's restricted tonnage methods of construction."

He heatedly attacked the charges made by Charles Dumont, of France, that the "pocket" ships are offensive. He referred to the charges as a myth and introduced a technical demonstration of why the light ships were built speedy and heavily armed to defend Germany against the superior tonnage of foreign attackers.

He also criticized the United States thesis of the defensive nature of battleships, saying:

"What about the blockade of our ports, which was the decisive turning point of the World War?"

"Why is your husband in such a rage?"

"They are praising marriage over the wireless!"—Dorfbartler, Berlin.

Just An Old English Custom

A. R. Garner may be truly said to carry his responsibilities lightly as he observes an old English custom and carries his bride, the former Miss Marjorie Pretwell, through the door of St. Cuthbert's Church, Yorkshire, after the ceremony.

When TEETHING makes HIM FUSSY

One of the most important things you can do to make a teething baby comfortable is to see that little bowels do their work of carrying off waste matter promptly and regularly. For this nothing is better than Castoria, a pure vegetable preparation specially made for babies and children. Castoria acts so gently you can give it to young infants to relieve colic. Yet it is always effective, for older children, too. Remember, Castoria contains no harsh drugs, no narcotics—is absolutely harmless. When your baby is fretful with teething or a food upset, give a cleansing dose of Castoria. Be sure you get genuine Castoria with the name:

Cast H. Fletcher
CASTORIA
CHILDREN CRY FOR IT

WORLD HAPPENINGS BRIEFLY TOLD

The Royal Canadian Mounted Police took over the policing of Prince Edward Island on May 1.

The highway programme of the government on relief road work cost approximately \$9,996,972.

E. C. Cox, of Limerick, Sask., is the winner of the Alexander Laird scholarship in English at Queen's University, it was announced.

More than 4,000 miles of roads in the national highway system of Italy were surfaced with bituminous dressing in the last 12 months.

The Duke of Connaught, Uncle of the King and former Governor-General of Canada, celebrated his 82nd birthday May 1, in his villa on the Riviera.

There is a possibility that Rt. Hon. Stanley Baldwin may not attend the Empire Economic Conference, because of the ill health of Premier Ramsay MacDonald.

The new trade treaty between Canada and New Zealand was given approval by the New Zealand Parliament when the bill ratifying the agreement was given third reading.

A bill to protect the northern Pacific halibut fishery industry, through carrying out a halibut convention between Canada and the United States, has been signed by President Hoover.

As part of its drive against Communism, the Australian Government recently took a number of children from the homes of their Communist parents and placed them in a state home.

An impressive military funeral was held at Ottawa when Inspector Alfred H. Joy, of the Royal Canadian Mounted Police, was buried. He was to have been married the day following his death.

How Earth Is Divided
Scientists estimate that 40 per cent. of the land area of the earth is desert, 30 per cent. is productive, and 30 per cent. is poor grazing land, forest, high mountains and waste. There is no agreement as to the exact portion that is inhabitable.

Flood Sufferers In China Are Starving

Matter Brought Before League Of Nations Manchurian Commission

News of how 6,000,000 Chinese flood sufferers in the Hwei River Valley north of Anhwei are existing chiefly on grass and bark, while some are being sold in a human market, was brought to the attention of the League of Nations' Manchurian Commission at Peking.

The affected area was estimated at twice the size of New York State.

The chief supply of food has been relief wheat from the United States. But owing to the trouble at Shanghai between the Chinese and Japanese and inconvenient transportation conditions only 4,000 tons of wheat thus far have reached the Hwei Valley, said Shaowu Peter Chuan, superintendent of the National Flood Relief Commission for the North Anhwei area.

It will be late in June before the wheat crop will have matured and the problem is to feed the starving millions, while the authorities do everything possible to improve transportation. Meanwhile, the refugees have been eating grass, weeds, sprouts and the bark of trees.

Relief workers reported to Chuan that the market price for the sale of humans is \$1 in Chinese money, or about twenty cents in American, for each year of the person's age. A ten-year-old child sells for \$10 or about \$2 in gold, the rate rising \$1 a year until the age of 25, when the price begins to recede.

IN THIS PRETTY DRESS, DIFFERENCE IS ARRIVED BY USING A PLAIN AND PRINTED FABRIC

Tiny girls love to have free and easy to wear clothes with skirts to swish about.

For those who look best with the fullness falling from the yoke, the narrow tie sash may be omitted.

It's a darling dress. The yoke and applied band at the hem are nautical blue plain batiste. The dress itself is white batiste all covered in blue spots.

It's such a cunning scheme, and youngsters love it.

Dimity prints, voile prints, gingham checks, candy striped cotton broadcloths and pique are also suitable.

Style No. 430 is designed for sizes 2, 4 and 6 years. Size 4 requires 1 1/2 yards of 35-inch figured with 3/4 yard of 35-inch plain material and 1 1/2 yards of binding.

Price of pattern 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

SHE HAD TO CRAWL TO BED

One stair at a time—on her hands and knees—that was how she had to do it. And when she did get to bed, her troubles were not over.

"Twelve months ago I could not sleep on account of the terrible pains in my knees, and I might say in all my joints. At night I could only crawl up to bed, one stair at a time. But since taking Kruschen Salts regularly, I have entirely lost all pains and stiffness, and, if needed, could now run upstairs two at a time. In fact, I feel 10 years younger. I shall never be without Kruschen Salts."—Mrs. A. E. D.

Do you realize what causes rheumatism? Nothing but sharp-edged uric acid crystals which form as the result of sluggish eliminating organs. Kruschen Salts can always be counted upon to clear those painful crystals from the system. The six salts in Kruschen are bound to dissolve away all traces of uric acid. And more! They ensure such perfect internal regularity that no such body poisons as uric acid are ever able to accumulate again. Prove this for yourself by buying a bottle of Kruschen.

Recipes For This Week

(By Betty Barclay)

COFFEE GINGER COOKIES

- 1 cup strong, hot coffee.
- 1 cup molasses.
- 1 cup brown sugar.
- 1 cup shortening.
- 1 tablespoon boiling water.
- 1 tablespoon ginger.
- 1 tablespoon cinnamon.
- Flour for mixing.
- 1 teaspoon soda.

Dissolve soda in boiling water and stir into molasses. Pour over the shortening. Add boiling coffee and sugar, and then add seasonings. Add flour until dough is stiff enough to roll. Roll and cut into desired shapes.

ORANGE CANDIED SWEET POTATOES

(Serves 6)

- 1 cup orange juice.
- 1/2 teaspoon grated orange rind.
- 1 cup water.
- 1/2 cup sugar.
- 3 tablespoons light corn syrup.
- 1/2 teaspoon salt.
- 1/4 cup butter.
- 6-8 sweet potatoes or yams.

Combine first seven ingredients and pour over peeled uncooked sweet potatoes arranged in casserole or baking dish. Bake covered in a moderate oven (375 to 400 degrees Fahrenheit) until tender, 30 or 40 minutes. Baste occasionally. Remove lid last 10 minutes to brown or put under blazer.

VARIATION: Just before removing from oven, add a layer of marshmallows and brown.

What the automobile has taught women about household lubrication

Experience with motor cars has taught women that moving parts must be protected against wear by a film of oil. Many of them haven't learned, however, that moving parts of sewing machines, vacuum cleaners, lawn mowers, washers, and other mechanical devices must also be protected against dirt and rust.

3-in-One Oil not only lubricates; it also cleans and protects. It is different from all others, because it is a scientific blend of three high grade oils—animal, mineral and vegetable. 3-in-One is the oil you should use on mechanical equipment if you want best results.

Don't risk your expensive household devices by using oil that does only half the job. Insist on the old reliable 3-in-One. It costs little more to buy and much less to use. At good stores everywhere. For your protection, look for the trade mark "3-in-One" printed in Red on every package.

A Missouri editor prefers a cow to a saxophone, because in addition to making the same noise the cow gives milk.

SUNDAY SCHOOL LESSON

MAY 15

JACOB AT BETHEL

Golden Text: "I am with thee and will keep thee whithersoever thou goest."—Genesis 28:15.

Lesson: Genesis 27:28.

Devotional Reading: Psalm 139:1-12.

Explanations and Comments

Jacob's Dream, verses 10-15. — Jacob was fleeing from Esau's wrath; He was going toward Haran when, quite by accident it would seem from the expression "He lighted upon a certain place," he came to the hillside near Bethel and there in a dream he had his vision of God.

"God pity the boy who leaves home and does not carry with him some kind of pointing finger that shows the way to God, some memories, some imaginations, that lead him to the place where God may be seen."—Ralph Connor.

Needing something for a pillow he could find nothing better at hand than one of the stones on the hillside. When Bishop Taylor returned to this country he had no use for soft pillows and more than once substituted a headrest of books.

The sun hung low in the sky as Jacob approached Bethel, and his last sight before falling asleep had been the hills around him, of limestone rock in strata that rise one above the other. He dreamed, and naturally dreamed of a flight of stone steps, or ladder, reaching to heaven. The ladder symbolized the thought that there is communication between heaven and earth, between God and man.

"The Spirit of God always conveys His teaching to his servants in language borrowed from their surroundings. John's Revelation is full of reminiscences of the Aegean, which sometimes murmured around the cliffs of his prison isle as a sea of glass bathed in fire, and at other times broke on them in yeasty foam. David's Psalms make constant reference to the wild hill country of Judea in which so many of them were composed."—B. F. Meyer.

"It is melancholy to hear of Bethels in the dim, far past if we are to conclude that that ladder between the soul and God has been pulled up, or pulled down, and that direct divine intercourse has ceased."—Rufus M. Jones.

"Heaven is not far from the earth. Even in the bleak and barren stretches of our life, when we feel lonely and desolate, there may come to us experiences which so cheer and assure us that they seem like very angels from above, and which carry us up from the depths of our desolation to the very gates of heaven."—J. E. McFadyen.

On Jacob's dream ladder the angels of God were ascending and descending, symbolizing the thought that there is communication between God and man. Before this Jacob knew that God is; now he learned that God was accessible. When he was living at home, where his life was made comfortable by the favoritism of Rebekah, his mother, there was no room in his mind for a revelation from God. When alone on the rocky hillside, with no one to help him, God found him susceptible to divine influence. Providence often thus prepares the way for revelation.

And then in Jacob's dream Jehovah appeared beside him and spoke words of encouragement and hope. Just as the stony landscape where he was lying was woven into his dream, so were the words of his father Isaac in that parting blessing; "God Almighty bless thee, . . . and give thee the blessing of Abraham . . . that thou mayest inherit the land of thy sojournings, which God gave unto Abraham,"—verses 3, 4. He heard God promise that he should inherit the land, that his descendants should be "as the dust of the earth" in number, and in him and in them "all the families of the earth should be blessed."

And then God added the assurance of His companionship and guidance; "And behold I am with thee and will keep thee whithersoever thou goest." "The God of Bethel" has become a phrase for God's ever-watchful care.

Do we think of God as the Comrade of our ways, as with us in all the experiences of life? Has the thought of the nearness of the presence of God been a working power in our lives? In peace will I both lay me down and sleep; for Thou, Jehovah, alone makest me to dwell in safety. Psalm 4:8.

What Is Fame

What is fame? Upon the walls of the corridor leading to the Parliamentary restaurant at Ottawa, there are etchings of all the Prime Ministers of Great Britain. The other day, when two American visitors were walking down this corridor, one of them stopped, pointed his cane at the etching of Disraeli, and knowingly remarked: "Ah, George Arliss."

Certain Is Right

Friend: Say, there's a bunch of people outside waiting to be presented to you. Among them is a bishop who says he married you some time ago. Film Actress: Gee! I'm practically certain I never married a bishop.

"DON'T BE ROBBED OF YOUTH!"

SAYS RALPH GRAVES

RALPH GRAVES
Scenario Writer

"Here in Hollywood," Ralph Graves, scenario writer, says, "women don't use birth-days as an excuse for growing old. They seem to know the secret of becoming more and more alluring year after year."

"The screen and stage stars usually keep that lovely irresistible glow that youngsters have. And lots of other women, these days, seem to have learned their complexion secret!"

"Above all, guard complexion beauty," the stars will advise you. "Use gentle, soothing Lux Toilet Soap regularly as we do!"

LEILA HYAMS
M.G.M. Star

Attresses the world over use fragrant, delicately white Lux Toilet Soap to keep their complexions always exquisite. In Hollywood, where 686 of the 694 important actresses are devoted to it, this fine soap is official in all the great film studios.

You are sure to love the way it cares for your skin! The caress of dollar-a-cake French soap for just 10c.

'Plane Surprises Natives

Dayaks Of Borneo Wanted To Know If Flying Machine Laid Eggs

The head-hunting Dayaks of Borneo were so intrigued at the sight of their first aeroplane that they wanted to know whether it laid eggs.

Richard Halliburton, of Memphis, who is on a leisurely flight around the world, told the story to associates in New York in a cable from Manila.

The Tennessee flyer's message said he had arrived at Manila at the end of a 40,000-mile flight and had spent three weeks in Borneo with his "plane, the 'Flying Carpet,' visiting the head hunting Dayaks, who never had seen an aeroplane.

"Took the chief flying in native undress, except for goggles," the cablegram said. "Apparently big event in Dayak's history. War boats were filled with warriors who came 100 miles to see the chief fly. Dayaks asked if aeroplane laid eggs."

Cried at Night

"Night after night, as soon as we would get settled in bed, baby would start crying . . . BABY'S OWN TABLETS changed all this. What a blessed relief," writes Mrs. Arthur Baker, Jr., Winona, Ont. Give Baby's Own Tablets for teething troubles, colds, fevers, colic. Absolutely SAFE. 25c package. 235

Dr. Williams' BABY'S OWN TABLETS

The forests of Quebec cover an area of more than 155,000,000 acres according to recent estimates.

Argentina has only about 7,000 plants using steam for power.

Porto Rico imported \$1,000,000 worth of jute bags in 1931.

GRAIN SHIPMENTS REPORTED FOR RUSSIAN POINTS

Vancouver, B.C.—The Vancouver Sun publishes the following:

"Coming as the most significant development in the Vancouver grain season, confirmation was secured of the sale of 1,500,000 bushels of grain for shipment to Russia from this port.

"Five vessels have been chartered to carry it to Vladivostok. The 'Castlemoor,' now loading here, is one. Names of the other four have not been disclosed.

"With Russia, three months ago regarded as the greatest menace to other wheat exporting countries, now back in world markets as a buyer, Vancouver grain men believed possibly 10,000,000 bushels of wheat would move through Vancouver to Siberia in the next few months.

"The 40,000 tons of grain going out on these five ships to a consuming channel undreamed of six weeks ago are generally understood to be supplies for Russian troops assembled in Siberia since the Manchurian border trouble with Japan.

"Not a great deal is known about the shipments since most of the wheat was negotiated in London.

"The London office of Kerr, Nifford and Company arranged four of the cargoes, it is understood.

"Two of the ships to carry the wheat were fixed in London, and the other three are stated to have been secured through the Canadian Transport Company of Vancouver.

"While the requirements of the Russian military forces in Siberia are considered the chief cause of the Canadian orders, the underlying reason for the shipments is believed to be new famine conditions in the Volga section of Russia.

Defendants Are Freed

One Hour Sentence Is Imposed In Connection With Massie Conviction

Honolulu.—Governor Lawrence M. Judd freed the four defendants of the famous Massie murder trial one hour after they had been sentenced to 10 years at hard labor at Oahu prison.

Sentence was passed in a surprise move on Lieut. Thomas H. Massie, his mother-in-law, Mrs. Granville Fortescue, and the two seamen, E. J. Lord and Albert O. Jones.

Their hour of confinement was spent in the nominal custody of the sheriff at Iolani Palace, across the street from the judiciary building where for several weeks they battled unsuccessfully for freedom on charges of slaying Joseph Kahahawai, asserted attacker of Mrs. Massie.

Governor Judd, in commuting the sentence to one hour, merely said he was acting on a petition of the four defendants in which their counsel joined and was commuting the sentence to one hour.

Editor Arrested

Finnish Newspaper Man Of Sudbury Whisked Away Under Police Guard

Sudbury, Ont.—Arvo Vaara, editor of the Finnish daily "Vapaus" and Martin Parker, translator, arrested in a Royal Canadian Mounted Police raid on the newspaper's offices, were loaded into an automobile and rushed out of town in a southerly direction. Five plain clothes detectives guarded them.

Mounted police refused to divulge the destination of the car bearing their prisoners and declined to discuss the case.

Had Money In Bank

Hamilton, Ont.—Buried as a pauper recently, Obadiah Markle had \$14,000 in the bank. Markle died in a rooming house, and his landlady recently found a bank book bearing a record of deposits. Investigation proved the money was actually there.

Bacon Export Higher

Ottawa, Ont.—During the first three months of the present year the total exportation of bacon and ham to Great Britain was 5,648,000 pounds as compared with 1,582,100 in the corresponding period of 1931.

W. N. U. 1941

Curtail Waste Of Gas

Steps Are Taken To Cut Down Gas Production In Turner Valley

Calgary, Alberta.—Turner Valley gas conservation board, formed by the government to curtail the waste of gas in Turner Valley gas field, announced that orders would be issued immediately requiring oil companies to cut down gas production. The board aims to lower production to 200,000,000 cubic feet daily in an effort to prolong the life of the gas fields.

It is understood oil companies will be informed that they have 48 hours to reduce their gas yield to conform with the board's objective. It is expected gas production will be curtailed greatly and most of the waste gas flares at the Turner Valley Wells practically extinguished.

The board members have elected A. A. Carpenter chairman. Other members of the board are John McLeish of the Department of Mines, Ottawa, and Dr. B. C. Wallace, president of the University of Alberta.

Adventurous Cruise

Small Vessel To Sail For Southern Seas In Search Of Treasure

Toronto, Ont.—Bound south, the 60-foot auxiliary schooner "Wanderer" will dip her flag in farewell to Lunenburg, N.S., in a few weeks on an adventurous cruise. Skipped by Lieut.-Commander Geoffrey Coysh, of Toronto, the little vessel will follow a long itinerary. The only woman in the crew is Mrs. Coysh, while Frank Everett, her brother, and Murdock Kirby are the other principals in what is hoped to be a search for treasure.

The party is to search for treasure in Cocos Island and collect data on the Hakkaids—the mysterious race said to inhabit Easter Island. Everywhere they visit, photographs are to be taken, and when the ultimate destination, Singapore, is reached, the party hopes to have one of the most valuable photographic collections of South Sea information in existence.

Assistance Will Be Given

Dominion To Stand Behind Provinces In Relief Matters

Ottawa, Ont.—The Dominion will contribute and where necessary loan also to the provinces in the matter of direct relief; a percentage of relief costs yet to be determined will be paid to the provinces; and if a province is unable at the moment to pay its share, the Dominion exchequer will loan this amount taking in security treasury bills.

This position of the Dominion Government was made clear in the House of Commons by Hon. W. A. Gordon, Minister of Labor, during consideration of the unemployment relief resolution. The minister was answering a request for the attitude of the Administration from Rt. Hon. Mackenzie King, opposition leader, and Hon. Ernest Lapointe (Lib., Quebec East).

Indians Getting Franchise

Many Being Recognized As Entitled To Full Citizenship

Ottawa, Ont.—The enfranchisement of Indians is proceeding with individuals receiving full citizenship by order-in-council as circumstances warrant.

Hon. T. G. Murphy, superintendent-general of Indian Affairs, told Dr. Peter McGibbon (Cons., Muskoka), in the House of Commons. Dr. McGibbon said in his constituency were two bands of Indians, to whose intelligence and industry he paid high tribute. They wanted full citizenship, and Dr. McGibbon felt they ought to have it.

Will Not Modify Bill

Dublin, Irish Free State.—The Republican Government of the Irish Free State effectively put down two opposition amendments which would have modified its bill to abolish the oath of allegiance to the British crown as a requisite to tenure of public office.

Death Toll Heavy

Jolo, Philippine Islands.—Belated reports brought the number of persons killed on the Island of Sulu by the recent typhoon to at least 65. It is feared that many others are dead. The authorities estimated that 65,000 were rendered homeless.

BREAKS RECORD

C. W. A. Scott, British flier, who has just set a new record for the flight from England to Australia. Scott's time for the 13,187 miles was eight days, thirteen hours and 53 minutes.

Protests Against Use Of American Ports

Maritime Senator Thinks Route For Canadian Grain Should Be Changed

Toronto, Ont.—Senator W. H. Dennis, of Halifax, told an interviewer it was "difficult for the people of the Maritimes to find justification for shipment of millions of bushels of Canadian grain through United States Atlantic ports."

He said United States railwaymen and waterfront workers were being provided employment handling Canadian grain while "the great Atlantic ports of Halifax and Saint John were idle as regards Canadian grain traffic."

Churchill Insurance Rates

Effort To Be Made To Secure Lower Rates On Grain Shipments

Ottawa, Ont.—Every effort is being made to secure insurance rates that will encourage grain shippers to use the new terminal facilities at Churchill on Hudson Bay. Hon. C. H. Cahan, secretary of state, advised the House in answer to questions.

The Imperial shipping board in England secured a reduction in the rate in 1931, Mr. Cahan said, and there were hopes of further reductions in the near future.

Will Use Regular Service

London, England.—The British delegation to the Imperial Conference at Ottawa will travel by the normal passenger service across the Atlantic and not in a vessel of the royal navy. This was the reply in the House of Commons to a query by Thomas Griffiths, Labor member.

Prepare For Conference

Alberta Arranging For Suggestions To Present To Imperial Parley

Edmonton, Alberta.—First steps toward preparing an Alberta statement for submission to the Imperial Conference in Ottawa next July are now being taken, it was announced by Premier Brownlee. As a preliminary step letters are being sent to organizations representing the economic interests in the province, in which they are invited to forward any suggestions they may have to offer.

It is expected that the Dominion Government will extend an invitation to the provinces to submit suggestions as to the position to be taken by Canadian interests at the conference.

The Alberta Government will also participate in a joint conference to which the Saskatchewan Government has invited its two neighboring provinces and which will be held about June 8. An exchange of views in preparation for the Ottawa conference will be the purpose of this interprovincial meeting, but Mr. Brownlee points out that it may not be found desirable to make a joint representation, inasmuch as the interests and resource of this province are much more varied than those of the other two provinces.

Dawson Ice Breaks Early

Woman Was Winner Of Annual Prize For Guessing Date

Dawson, Y.T.—The ice in Yukon River moved out in front of Dawson on May 1 at 7:32 p.m., Y.T., thus deciding Dawson's annual ice sweepstake to which guesses this year were confined solely to Dawson City and the immediate vicinity.

Total pool was \$1,200, given as one prize and won by Mrs. Negun of Gold Bottom Creek, with a guess of May 2, 7:37 p.m.

This is one of the earliest break-ups of the ice at Dawson in the memory of the white men.

Naval Appointments

Ottawa, Ont.—The appointment of Commander V. C. Brodeur as commander-in-charge at Esquimalt, B.C., effective from May 27, was announced by the Department of National Defence. It was also announced that Commander G. C. Jones would take command of H.M.C.S. Skeena, and the western division on May 25.

U.S. Taxes All Cheques

Washington, D.C.—A flat rate of four cents on the sale of each \$100 bond was voted by the United States senate finance committee. The rate was the same as set for stock sales. The committee made all cheques subject to the two cents tax, eliminating the \$5 exemption allowed in its original proposal.

Germany's Rebuilt Navy

Here are two of the first pictures to be made of the new German navy built to replace the Imperial Navy which was scuttled at Scapa Flow, Scotland, after surrender to the British. Sailors of the cruiser Koenigsberg are shown at anti-aircraft gunnery practice, during recent manoeuvres in the Baltic Sea. Note that the men are equipped with the latest type gas masks. Inset shows some of the ships of the fleet in line.

BILL IS DRAFTED TO DEAL WITH UNEMPLOYMENT

Ottawa, Ont.—The House of Commons took the first step to clothe the government with wide powers to combat unemployment. A bill was given first reading which would confer almost blanket power on the ministry until the end of the fiscal year next March. Debate on the resolution which prefaced the introduction of the bill was desultory.

Under the terms of the bill, which may meet more concerted opposition in its later stages, the government would possess power to negotiate agreements with the provinces, grant financial assistance to them and take steps "to protect the credit and financial position of the Dominion or any province." Money might be loaned to public or private undertakings. One clause of the bill would enable the government to "assist in defraying the cost of the sale and distribution of the products of the field, farm, forest, sea, river and mines," and this has given rise to speculation concerning a bounty system on the products of some primary industries.

The bill contained no limit on the money that might be expended by the Dominion.

The back-to-the-land movement, if encouraged by the government should not be confined to crown lands, said W. W. Kennedy, (Cons., Winnipeg South Centre). He knew of many good farms which had been returned to the municipalities for various reasons, and it was to these farms already partially cultivated and equipped that the movement should be directed.

Hon. W. R. Motherwell (Lib., Melville), said Saskatchewan had for many years, before the three successive crop failures in certain parts, produced more wheat than all the rest of the Dominion together. In connection with the five-cent bonus on wheat a request had been made to the government, he said, for an acreage bonus of \$1 per acre of seeded acreage. Later on, Mr. Motherwell suggested, the government might announce its attitude towards the request for an acreage bonus.

Amazing Spirit Manifested

No Evidence Of Complaining On Part Of Business Men and Farmers

Vancouver, B.C.—Impressed with "the amazing spirit of optimism and hope" on the Canadian prairies, Hon. H. H. Stevens, Minister of Trade and Commerce, reached Vancouver for convocation of the University of British Columbia.

There is no evidence of whining or complaining on the part of business men and farmers in the prairie provinces," he said. "Crop prospects are good and when harvest comes there should be a wide demand for labor. It is noticeable that there is a return to the old horse power in replacing machine power on the land."

Passed Both Houses

Royal Assent Is Given To Number Of Bills

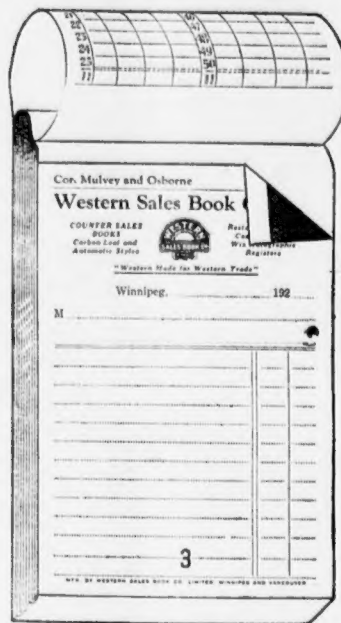

Ottawa, Ont.—Chief Justice Anglin, as Deputy to the Governor-General gave royal assent in the senate to a number of bills which had passed both houses. These bills include the following: To amend the patent act, to amend the petroleum and naphtha inspection act; respecting debts due to the crown; to amend the opium and narcotic drugs act, 1929; to amend the Yukon quartz mining act; respecting the Canadian Pacific Railway Company; to amend the destructive insect and pest act; to incorporate Lake of the Woods International Bridge Company.

Receive Flower Seeds

Toronto, Ont.—Flowers will bloom again in drouth-stricken western Canada. A letter received by W. L. Aiken, Toronto, originator of the idea of despatching flower seeds to western Canadians, expressed gratitude for the thoughtfulness of Ontario people. The letter was signed by C. B. Daniel, general manager of the Saskatchewan Relief Commission.

WHO KILLED COCK ROBIN?

(The Calgary Albertan)

The resignation of Mr. W. L. Mc-
Dougald from the Senate, as a result of
the Beauharnois investigation, clears
the air. He could have followed no
other course and it is unnecessary to
heap additional coals of fire upon his
head. The other Senators involved
have also received rebukes.

However, let us not forget—as we
are inclined to—that the real fight for
an inquiry into Beauharnois was won,
not by Mr. Senator Melghen nor by
any Conservative, but by two U.F.A.
members—Messrs. Garland and Gard-
ner, aided by J.S. Woodsworth.

Two years ago they were hampering
until they gained it. It is true that
these men also might be looked upon
as making a political gesture—since
it is the policy of that group to frown
upon private ownership of great utili-
ties and this was an excellent oppor-
tunity to show up a great private utili-
ty in a not too glorious light—but the
fact remains that had they not been
so persistent in their endeavors, the
major parties might not have been
forced into that fight which eventually
threw discredit not so much upon the
privately owned utility as upon our

politicians and our political system.

Furthermore, perhaps the finest com-
pliment in this connection which these
men received was from no less a per-
son than Mr. Sweezy, the engineer
and originator of the Beauharnois
scheme. Mr. Sweezy—who, one sus-
pects, paid politicians without neces-
sarily liking them—said, of the U.F.A.
members: "These are honest men."

POULTRY NOTE

When a guy that's too dumb to come
out of the rain
Gets an idea firmly embedded
In the empty apartment that serves
him for brains
He's too good for his lawfully wedded,

And searches around for a hole in the
fence
He can crawl through at nights and
go larking,
Determined to follow, whatever the
expense,
Postgraduate courses in sparking.

It reminds me of days I was down on
the farm
When the farm college specialists
uster
Give long-winded lectures explaining
the harm
Of too many hens for one rooster.
—Walter C. Hawes.

One enterprising farmer in southern
Saskatchewan has reported to the Do-
minion Agricultural Credit Company
a new plan to check the troublesome
nose fly which bothers sheep in the
summer. The old plan was to daub tar
liberally on the nose of the animal.
Under the new idea the farmer obtains
some discarded railroad ties and bores
several holes three inches in diameter
about a foot apart. The holes are then
filled with salt and tar is daubed li-
berally around and on the inside of
the holes. The sheep in reaching their
tongues into the holes to obtain the
salt anoint their noses with tar, there-
by saving the herdsman the trouble
and at the same time checking the
ravages of the nose fly.

THE HOUSE OF DREAMS-COME-TRUE

— BY —
MARGARET PEDLER
Author Of
"The Splendid Folly," "The Hermit Of Far End,"
Hodder & Stoughton, Ltd., London.

CHAPTER XX.—Continued.

She paused, and the liquid in the black pot over the fire seethed up suddenly and filled the silence with its chuckling and gurgling, so that to Jean it seemed like the sound of some hidden malevolence chortling defiance at her.

The old woman clutched her hand a little tighter, turning the palm so

that the light from the tiny window fell more directly upon it.

"There's a castle waitin' for 'ee, me dear," she resumed in the same sing-song voice as before. "I can see it so plain as plain. But yu won't never live there w' the one yu love, though yu'm hopin' to. I see ruin and devastation all around it, and the sky as red as bld above it."

She released Jean's hand slowly, and her curiously bright eyes fastened upon Tormarin.

"Shall I tell the gentleman's hand?" she asked, stretching out her withered claw to take it.

But he drew it away hurriedly. "No, no," he said, attempting to speak lightly. "This lady's fortune isn't sufficiently encouraging for me to venture."

The gipsy's eyes never left his face. She nodded slowly.

"That's as may be. For tez the zaim luck and zaim ill-luck will come to yu as comes to thikke maid. There's no ring given or taken, but yu'm bound together so fast and firm as weddin'-ring could bind 'ee."

Jean felt her face flame scarlet in the dusk of the tiny room, and she turned and made her way hastily into the sunshine once more, thankful for the eager queries of Nick and Claire, which served to bring back to normal the rather strained atmosphere induced by the gipsy's final comment.

As they climbed the side of the tor once more, Jean relapsed into silence. More than once, more than twice, since she had come to England, she had been vaguely conscious of some hidden menace to her happiness, and now the gipsy had suddenly given words to her own indefinite premonition of evil.

"For there's darkness comin' . . . black darkness."

It was a relief to join the rest of the picnic party, who were clamouring loudly for their lunch, good-humouredly indignant with the wanderers for keeping them waiting.

"Another five minutes," announced Burke, "and we should have begun without you. Not even Lady Anne could have kept us under restraint a moment longer."

The party was quite a large one, augmented by a good many friends from round about the neighborhood, and amid the riotous fun and ridiculous mishaps which almost invariably accompany an alfresco meal, Jean contrived to throw off the feeling of oppression generated by Keturah's prophecy.

Burke, having heaped her plate with lobster mayonnaise, established himself beside her, and proceeded to catechise her about her recent experience.

"Did the lady—what's her name, Keturah?—tell you when you were going to marry me?" he demanded in an undertone, his dare-devil eyes laughing down at her impudently.

"No, she did not. She only foresees things that are really going to happen," retorted Jean.

"Well, that is"—composedly. "She can't be much good at her job if she missed seeing it."

"Well"—Jean affected to consider—"the nearest she got to it was that

she saw 'darkness coming . . . black darkness.'"

Under cover of the general preoccupation in lunch and conversation, Burke's hand closed suddenly over hers.

"You little devil!" he said, half amused, half sulky, "I'll make you pay for that."

But out here, in the wind-swept, open spaces of the Moor, Jean felt no fear of him.

"First catch your hare—" she retorted defiantly.

He regarded her tensely for a moment.

"I'll take your advice," he said briefly. Then he added: "Did you know that I'm driving you back in my car this afternoon?"

Various cars and traps and saddle horses had brought the party together at the appointed rendezvous—a little village on the outskirts of the Moor, and Jean had driven up with Blaise in one of the Staple cars. She looked at Burke now, in astonishment.

"You certainly are not," she replied quickly. "I shall go back as I came—in the car."

"Quite impossible. It's broken down. They rashly brought on the lunch hampers in it, across that God-forsaken bit of moor road—with disastrous consequences to the car's internals. So that you and Tormarin have got to be sorted into other conveyances. And I've undertaken to get you home."

Jean's face fell a little. Throughout the drive up to the Moor Blaise had seemed less remote and more like his old self than at any other time since their quarrel, and she could guess that this arrangement of Burke's was hardly likely to conduce towards the continuance of the new peace.

"How will Blaise get home?" she asked.

"They can squeeze him into her car, Judy says. It'll be a tight fit, but he can cling on by his eyelashes somehow."

"I think it would be a better arrangement if you drove Blaise and I. There's certainly not room for two extra in the car. There isn't really room for one."

"There wouldn't be two. You would drive Blaise."

"Pardon me. I should do nothing of the sort."

"Do you mean"—incredulously—"that you would refuse?"

"Oh, I should invent an armour-plated reason. A broken spring in the dog-cart or something. But I do mean that if I don't drive you, I drive no one."

Jean looked at him vexedly.

"Well," she said uncertainly, "we can't have a fuss at a picnic."

"No," agreed Burke. "So I'm afraid you'll have to give in."

Jean rather thought so, too. There didn't seem any way out of it. She knew that Burke was perfectly capable, under cover of some supposed

THE woman who lets headaches upset her plans must have her eyes and ears closed to certain facts about Aspirin. There is always swift comfort, and never any harm, in Aspirin tablets. Doctors have said so; men and women everywhere have found it so. Any headache—from any cause—is always relieved by one or two tablets. And lots of other aches and pains. Neuralgia. Neuritis. Rheumatism. Nagging pains. The pain from colds which make you "ache all over." Sore throat. Systemic or "muscular" pain. Aspirin can spare you lots of needless suffering! Be sure you get Aspirin—not a substitute!

ASPIRIN

MADE IN CANADA—TRADE-MARK REG.

mishap to his trap, of throwing the whole party into confusion and difficulty, rather than relinquish his intention.

"Oh, very well," she yielded at last, resignedly. "Have your own way, you obstinate man."

"I intend to," he replied coolly. "Now—and always."

CHAPTER XXI.

Divers Happenings

"I don't think I want any champagne," said Claire, smilingly, as Nick filled a glass and handed it to her. "Being utterly free like this produces much the same effect. I feel drunk, Nick—drunk with happiness. Oh, why can't I be always free—"

She broke abruptly in her speech, her face whitening, and stared past Nick with dilated eyes. Her lips remained parted, just as when she had ceased speaking, and the breath came between them unevenly.

Nick followed the direction of her glance. But he could see nothing to account for her suddenly stricken expression of dismay. A man in chauffeur's livery, vaguely familiar to him, was approaching, and it was upon him that Claire's eyes were fixed in a sick gaze of apprehension. It reminded Nick of the look of a wounded bird, incapable of flight, as it watches the approach of a hungry cat.

"What is it?" he asked quickly. "What's the matter? For God's sake don't look like that, Claire!"

Slowly, with difficulty, she wrenched her eyes away from that sleek, conventional figure in the dark green livery.

"Don't you see who it is?" she asked in a harsh, dry whisper.

Before Nick could answer, the man had made his way to Claire's side and paused respectfully.

(To Be Continued.)

Mothers Value This Oil—Mothers who know how suddenly croup may seize their children and how necessary prompt action is in applying relief, always keep at hand a supply of Dr. Thomas' Electric Oil, because experience has taught them that this is an excellent preparation for the treatment of this ailment. And they are wise, for its various uses render it a valuable medicine.

Archaeologists excavating the market place of Athens hope this year to bring to light the Senate House and the Temple of the Mother of the Gods.

Douglas' Egyptian Liniment should be in every household. Stops bleeding at once, cauterizes wounds and prevents blood poisoning. Keeps away inflammation. Removes proud flesh.

New York state contains 49,204 square miles.

Little Helps For This Week

"And now I exhort you to be of good cheer."—Acts xxvii. 22.

Make me as one that casteth not by day

A dreary shadow, but reflecting eye
One little beam, loved, warmed, and golden caught
From the bright sun that lights our daily way.

You find yourself refreshed by the presence of cheerful people; why not make earnest efforts to confer that pleasure on others? You will find half the battle is gained if you will never allow yourself to say anything gloomy.—Lydia M. Child.

ACID STOMACH IS DANGEROUS

Sufferers From Indigestion CUT THIS OUT

"Stomach trouble, dyspepsia, indigestion, sourness, gas, heartburn, food fermentation, etc., are caused nine times in ten by chronic acid stomach," says a well known authority.

Burning hydrochloric acid develops in the stomach at an alarming rate. The acid irritates and inflames the delicate stomach lining and often leads to gastritis or stomach ulcers. Don't dose an acid stomach with pepsin or artificial digestants that only give temporary relief from pain by driving the sour, fermenting food out of the stomach into the intestines.

Instead, neutralize or sweeten your acid stomach after meals with a little Bisulphated Magnesia, and not only will the pain vanish but your meals will digest naturally. There is nothing better than Bisulphated Magnesia, to sweeten and settle an acid stomach. Your stomach acts and feels fine in just a few minutes. Bisulphated Magnesia can be obtained from any reliable druggist in either powder or tablet form. It is safe, reliable, easy and pleasant to use, is not a laxative and is not at all expensive.

Idle Money Earns Nothing

When Waterloo Bridge in London, England was built 120 years ago several sovereigns were buried in a block of granite forming part of it. When this bridge is pulled down each of these sovereigns will be worth 27s. 9d. when recovered, but had they been invested each of them would now be worth about 100 pounds.

The last session of U.S. congress saw the introduction of 6,041 bills.

There is NO ODOR from FISH

or from Vegetables cooked in CANAPAR

Boiled, or steamed, fish comes out firm and solid, swimming in its own juice, when you seal it up in Canapar Cookery Parchment. No fishy odor. No gummy steamer or saucepan to clean out afterwards.

And vegetables are simply delicious. Using Canapar you can cook three at once in the same pot over one burner turned low. Canapar acts on them as it does on fish. Retains all the mineral salts and flavor.

Fat and juices from meat won't burn if you line your roasting pan with Canapar. No pan-scraping afterwards.

Canapar only costs 25 cents for a large envelope. You can use each sheet repeatedly because it won't absorb odors. Makes a perfect dish cloth because it is silky, strong, and doesn't spread lint.

Special Offer

CANAPAR is made by the makers of the famous PARASANI Heavy Waxed Paper in the Green Box. Most grocers, druggists and department stores have Canapar on sale, but if yours hasn't send coupon direct to the makers and we'll give you a new and unique book entitled "Leftovers", containing one hundred recipes as a bonus for your trouble.

Appleford Paper Products, Ltd.,
Hamilton, Ontario.

Enclosed find 25c for which please send me one full size package of CANAPAR COOKERY PARCHMENT and your 100 recipes for "Leftovers".

Born, to Mr. and Mrs. Jack Hay, on Saturday, May 7, a son.

Miss Myrtle Oliphant came out from Calgary on Friday and spent the week end at her home here.

Born, to Mr. and Mrs. Chas. Guynn, on Thursday, May 5, a daughter.

A crew of about forty-five men are at work on the telephone system near the Service Station on the pole line.

Tax notices are in the mails this week. The school tax notices were printed out of town, at no saving to the tax payers whatever.

S. F. Torrance was a Drumheller visitor on Tuesday.

The Board of the United Church attended the Presbytery meeting at Acme last Thursday. As a result of their presence they queried a proposal to have the present boundaries of the Carbon field changed.

Hugh Brown and W. Milligan have secured lots on the hill near the Greenhalgh residence, and their houses from the old mine site are being moved to the new location this week.

A double program will again be the attraction at the Carbon theatre next Monday. Lewis Ayres in "Iron Man" will be one feature, and the other is Ken Maynard in "Alias the Bad Man."

Guy Shell Dead

The following account of the death of the late W. G. Shell of Carbon appeared recently in the Vendalla (Mo.) Leader:

Guy Shell, age 48, died at his home in Carbon, Canada, according to information received here this week by his uncle Judge Guy McCune. He is the son of the late Mr. and Mrs. J. T. Shell, who for years lived on a farm north-west of Laddonia. As a young man he lived with his uncle, Judge Guy McCune and attended Prairie View school where he will be remembered by many of our readers and many of the pupils of those years. Personally I have known him since that time and never knew a young man whom I thought more of and had greater hopes for him in the future. At one time he had increased his wealth to many thousands of acres of Canadian land, but the depression no doubt reduced his wealth somewhat. He was a genial good companionable young man and attracted many good friends to him while he lived here. He has visited in this community once or twice since he left for Canada. He was a bachelor and leaves his sisters and many other relatives in this community and different states.

Remember! When the next printing salesman walks into your office and asks you for a printing order, tell him that there is a printer in town and that he CAN do that particular job.
